## EduCMS

**CONTENT MANAGEMENT SYSTEM WEBSITE  
FOR EDUCATIONAL INSTITUTIONS**

Is your institution struggling to maintain your website? Out of date content, disorganized design and navigation, poor control and bottleneck for your visitors? No longer can information be published online in a manual process using static website and be left unattended with same information for years.

With the explosive growth of Internet as information tool and websites as publishing tool of this information requires you to use your institution website effectively. Online information must be continually reviewed and updated by content editors so that Parents, Students, Trust, Teacher, Alumni and many more have access to most important up-to-date information whenever required.

Our development team is constantly reaching beyond the boundaries of the traditional website to offer powerful and functionality-rich CMS website with new technologies. Techjet Solutions combines the performance of professional Content Management Tools with an attractive, intuitive, professional user interface into EduCMS to built dynamic websites and web portals with CMS (Content Management System) developed using PHP/MySQL Technology.

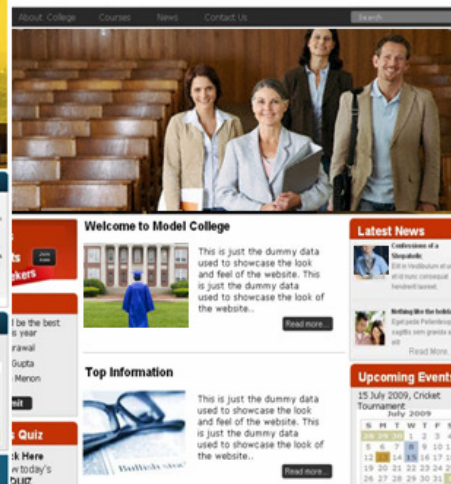

EduCMS Solutions is content management and web authoring system with the flexibility to provide you with 100% control over all content and creative aspects of your website. An unprecedented range and depth of enhanced functionalities, powerful features, user-friendly interface allowing you to create "N" number of pages and continuously edit your rich text content along with many other functionalities as follows:
